5: Rouse E-4 (no date) 1948 ST13 Callinago ST13 (1650-1700)

When a man
died all the relatives examined his body to satisfy themselves that he had not been killed by sorcery. The body was washed, painted, oiled as in life, flexed, and wrapped in a new hammock. It was placed upon a stool in a grave dug in the carbet, near the wall in the case of an ordinary person but in the center if the man were prominent, its eyes were weighted shut, and mats were added to protect it from the soil. The grave was not filled for 10 days, during which the relatives brought food and water to the corpse twice a day and lamented over it. A fire was built around the grave to purify it and to prevent the deceased from catching cold. The deceased's possessions were either cast into this fire or were placed in the grave; sometimes the house was burned too. In prehistoric times a slave or a dog was killed and put in the grave to care for the dead person. If the deceased were a warrior, the chief delivered a funeral oration, extolling his exploits. There was also a feast over the grave, accompanied by dancing. The close relatives fasted and cut their hair in mourning; some time afterward they held a second feast over the grave. In the case of a chief the *Carib* sometimes burned the corpse and mixed its ashes into a drink.

764 [763 754]

WARFARE

The *Carib* posted sentinels near all harbors to watch for the approach of raiding parties. They held assemblies to decide upon war and to fix a rendezvous; at these meetings the old women harangued them on the cruelty of the enemy, the war chief exhorted them to revenge themselves, they became very drunk, and at the height of the festival they ate some enemy flesh, smoked and preserved from the last raid. Each warrior present was given a gourd full of pebbles, a string with knots, or a stick with notches, to tell how many days before he had to be at the rendezvous. He spent the time repairing his pirogue and his weapons, while his wives prepared food for the raid.

721 [21]

The principal *Carib* weapon was the bow and arrow, the former 6 feet (1.8 m.) long, the latter poisoned, occasionally feathered, and provided with a separate barbed point. The poison came from the sap of the manchineel tree; the points were of fishbone, tortoise shell, or fire-hardened wood. There were also javelins and clubs (boutou), the latter engraved and painted with geometric and anthropomorphic designs. These clubs, which varied in length according to the rank of the owner, were used after the supply of arrows had been exhausted (pl. 93).

641

The *Carib* attempted to catch the enemy asleep in their villages. They attacked at dawn, or at night when there was a full moon. Divided into three bands, they fell upon the village, uttering war cries and shooting fire arrows (having cotton heads).

726

If the enemy resisted successfully, the *Carib* retired at noon, taking with them their dead and wounded. They might re-form for another
